# Introduction

The Annual Element of the Montana Comprehensive Highway Safety Plan provides, for each CHSP emphasis area, descriptions of programs and countermeasures currently being implemented and detailed information on new strategies to be undertaken through the CHSP. The Annual Element will be maintained and updated annually by the CHSP Committee to provide documentation and updates for Montana's existing highway safety programs and to report the status of CHSP strategy implementation.

# Table of Contents

# Emphasis Area #1. Safety Belt Use

**Champion:** Mike Cooney (State Senator) and Priscilla Sinclair (MDT-SHTSO)

**Objective:** Increase Safety Belt Usage to 90 Percent.

**Performance Measures:**

- Annual statewide safety belt utilization for all roads; and
- Annual restraint use by occupant fatalities.

Montana has secondary law enforcement for safety belt use, meaning that there must be another reason for stopping a vehicle other than noncompliance with safety belt laws before a violation can be charged. Although Montana ranks relatively high for overall seat belt usage among states with secondary law enforcement (80.0 percent in 2005 for all roads), NHTSA documentation shows that most states with a primary enforcement law have higher compliance rates. Montana has established a variety of programs to encourage safety belt use and proper utilization of child safety restraints. New strategies focus on the establishment of a primary safety belt law and targeted enforcement and education for low belt use populations.

<b>D. Increase safety belt usage to 90%</b>			<b>Implementation Team: MDT-SHTSO Rep., Spook Stang (MMCA), Col. Paul Grimstad (Hwy Patrol), Judge Greg Mohr, Bobbi Perkins (DPHHS, contact for STCC), Sen. Frank Smith, Myron Oats (Chippewa Cree Tribe), FMCA(?), Denise Harris (?)(AAA). Plus any others with expertise or interest.</b>						
<b>SB-2 Primary Safety Belt Law/Child Passenger Safety (35 votes)</b> Enact primary safety belt enforcement law. Specific action items to support a legislative initiative were developed by Action Team. (NHTSA – Proven effectiveness)	Dept. of Justice will be sponsoring agency. Dept of Transportation will provide technical assistance.	Pam Bucy (DOJ) will draft the legislation. Draft will be shared with DOT and other stakeholders for edits and suggestion.	Mike has a message into Pam to discuss this with her and to agree to a timeframe for completion of draft.	1. Pam will draft legislation.	The Director of DOT and Attorney General have met and agreed on strategy for Bill sponsorship and drafting.	No identified funding needs at this point. DOT committed to fund the postcard education pieces and monthly mailings.	Mike Cooney	Success or failure of legislation.	Track success of building community, business, and law enforcement support for legislation.
	MDT	MDT- SHTSO	Offer technical and informational support as needed to sponsoring agency.	2. DOT will send informational seatbelt postcards to stakeholders beginning July 2006.	DOT will begin outreach technical education of stakeholders.	MDT-SHTSO	Mike Cooney		Track legislation.
<b>SB-5 Targeted Education/ Enforcement in Low Belt Use Locations/Population Groups (22 votes)</b> Identify and target enforcement and education to low belt use locations/ corridors with a high incidence of unbelted fatal and injury crashes and population groups. (Consultant suggestion)	MDT	MDT- SHTSO	Target Step grant activities in low-use areas/high-crash areas/ Identified low-use population groups.	Governors Highway Safety Plan.	Implementation team will begin outreach to business, law enforcement community and other interested stakeholders.	MDT-SHTSO	Priscilla Sinclair	Annually to NHTSA	Implementation success.
	MDT	MDT- SHTSO	Expand campaign targeted at Native American population groups to all reservations and high-concentration areas of Native Americans in Urban areas.	Governors Highway Safety Plan.	SKSC Coalitions will continue community outreach/ education on crash data and outcomes.	MDT-SHTSO	Priscilla Sinclair	Annually to NHTSA	Targeted audience reached.
	MDT	MDT- SHTSO	Increase use and campaign targeting young, male, truck driver population group, with focused effort in high-risk corridors/locations.	Governors Highway Safety Plan.	Work with Marketing agency to reach targeted audience.	MDT-SHTSO	Priscilla Sinclair	Annually to NHTSA	Targeted audience reached.

CHAMPION: Name: Mike Cooney (State Senator) and Priscilla Sinclair (MDT-SHTSO) E-mail: mcooney@mt.gov Phone #: 841-2042_____	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementation Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
<b>D. Increase safety belt usage to 90% (continued)</b>			<b>Implementation Team: MDT-SHTSO Rep., Spook Stang (MMCA), Col. Paul Grimstad (Hwy Patrol), Judge Greg Mohr, Bobbi Perkins (DPHHS, contact for STCC), Sen. Frank Smith, Myron Oats (Chippewa Cree Tribe), FMCA(?), Denise Harris (?)(AAA). Plus any others with expertise or interest.</b>						
	MDT	MDT- SHTSO	Work with local law enforcement/highway patrol on obtaining and sustaining new officers designated specifically for traffic enforcement.	Governor’s highway safety Plan.	Work with Highway patrol/ local law enforcement.	MDT-SHTSO	Priscilla Sinclair	CHSP Committee annually	Implementation success and identification of sustainable funding.
	MDT	MDT- SHTSO and MDT – Engineering	Expand the use of local statistics in educational and informational materials to stimulate increased public interest and awareness.	MDT-SHTSO Seat belt assessment.	Coordinate current data with public awareness efforts.	MDT-SHTSO	Priscilla Sinclair	CHSP Committee annually	Publications with most current and appropriate data.
	MDT	MDT- SHTSO	Adopt quantifiable objectives and performance measures for evaluation and review of all occupant protection projects that clearly correlate with the State’s program goals and objectives. Establish and provide examples of evaluation options in subgrants, such as pre and post evaluations or comparison data demonstrating a change in awareness, knowledge, and/or occupant protection behaviors.	MDT- SHTSO Seat belt assessment.	Internal review of performance objectives as well as partner evaluation.	MDT-SHTSO	Priscilla Sinclair	NHTSA/CHSP Committee	Status of objectives and performance measures.
<b>SB-6 Incentive Programs (5 Votes)</b> Establish incentive programs for safety belt use. Rewards include cash, coupons for merchandise or food, T-shirts, and raffle tickets. (NHTSA – Proven effectiveness in low-belt use settings).	MDT/Law Enforcement	MDT- SHTSO	Include incentive programs with spot check programs.	Governor’s Highway Safety Plan.	Law enforcement and MDT.	MDT-SHTSO	Priscilla Sinclair	NHTSA/CHSP Committee	Status of program.
	MDT	MDT- SHTSO	Seek grants or support from local businesses to sustain incentive programs aimed at increasing seatbelt use.		Public outreach.	Sustained funding mechanism	Priscilla Sinclair	CHSP Committee annually	Funding attainment.
	MDT/Law Enforcement	MDT- SHTSO	Develop a program to coordinate incentives for seat belt use with enforcement efforts.		Law enforcement and MDT.	MDT-SHTSO	Priscilla Sinclair	NHTSA/CHSP Committee	Program development.
	MDT	MDT-SHTSO	Work with tribes to identify best mechanism for outreach efforts to include incentives for safety belt use for all Montana tribes.	MDT-SHTSO Seat belt assessment.	SKSC and the public.	MDT-SHTSO	Priscilla Sinclair	CHSP Committee annually	Increase outreach.

## Emphasis Area #2. Alcohol- and Drug-Impaired Driving Crashes

**Champion:** Judge Greg Mohr

**Objective:** Reduce Statewide Alcohol- and Drug-Impaired Fatal and Incapacitating Injury Crashes.

**Performance Measures:**

- Total annual alcohol- and drug-related fatalities;
- Annual alcohol- and drug-related fatality rate (per 100 M vehicle miles of travel); and
- Annual alcohol- and drug-related fatalities as a percent of all traffic fatalities.

In 2004, 46.3 percent of all Montana traffic fatalities were alcohol-related. Montana's alcohol-related fatality rate (the number of alcohol-related traffic fatalities per hundred million VMT in Montana) was 0.95, a decrease of 18.8 percent over the previous year and 16.7 percent over the average of the preceding 5 years. Nevertheless, this rate is more than double the national rate (0.43 in 2004) and the second highest alcohol-related fatality rate in the United States.<sup>1</sup> Current programs to address impaired driving encompass numerous education, enforcement, engineering, and treatment programs at the state and local levels, recognizing the severity of the problem in Montana.

---

<sup>1</sup>South Dakota's alcohol fatality rate in 2004 was .98. (Source: FARS).

---

# **Alcohol- and Drug-Impaired Driving Crashes**

## *New Strategies*

<b>CHAMPION:</b> Name: Judge Greg Mohr E-mail: _____ Phone #: _____	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementation Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
<b>A. Reduce statewide alcohol-and drug-impaired fatal and incapacitating injury crashes</b>			Implementation Team: Joan Cassidy (DPHHS), Audrey Allums (MDT-SHTSO), Myron Oats (Chippewa Cree Tribe), Steve B(?) (Hwy Patrol), Bobbi Perkins (DPHHS), Spook Stang (MMCA). Plus any others with expertise or interest.						
<b>AL-4 Stronger Penalties for BAC Test Refusal Including Consistency Between Jurisdictions and State (23 votes)</b> Establish stronger penalties for BAC test refusal than for test failure. Current penalty for 1 <sup>st</sup> refusal is 6 month mandatory license suspension. (AASHTO – Tried; also recommended in NHTSA Impaired Driving Assessment; NHTSA - Proven)	Montana County Attorney's Association	Agency/ Organization/ Tribal Heads	Legislation	DMV/DOJ	Bill Sponsor	NHSTA Info to all states	Greg Mohr and Implementation Team	DMV/Courts	DMV/Courts/Highways Safety Office
<b>AL-8 Monitoring of DUI offenders (15 votes)</b> Monitor all convicted DWI offenders closely. Develop an Impaired Driver Tracking System including data on all DWI offenders’ actions in the criminal justice, drivers licensing and treatment systems. – as it applies to all drivers including commercial motor vehicle drivers. (AASHTO – Proven; Impaired Driving Assessment; NHTSA - Proven)	DPHHS, DMV,Courts/Tribal Courts	Greg Noose, DOJ	Possible legislation or ARM Change	DMV/DOJ	Electronic reporting to responsible entities	Existing system in place	Greg Mohr/Implementation team	States report to Feds	NHTSA annual report
<b>AL-15 Add Notice onto CMV License for any Incidence of Failed Drug/Alcohol/DUI Test (7 votes)</b> Develop mechanism and process to be implemented that will identify to potential employers any incidence of failed drug/ alcohol or DUI testing of applicant both in Montana and outside the state. (CTSP committee suggestion)	FMCA, DOT, Employers	DMV/Greg Noose/NHTSA	State to Fed MCA to Carriers		Coordination with all affected agencies	Existing system in Place	Greg Mohr/Implementation team	Employers, States	Annually assess State Federal – annually NHTSA - collects and transmits Employers report as information received to states/feds

## Emphasis Area #3. Native American Crashes

**Champion:** Henri Headdress (Transportation Planner, Fort Peck Tribes)

**Objective:** Reduce Native American Fatalities.

**Performance Measures:**

- **Total annual Native American traffic fatalities; and**
- **Annual Native American traffic fatalities as a percent of all Montana traffic fatalities.**

Native Americans make up 6.2 percent of Montana's population, yet in 2005 they accounted for 13.5 percent of the State's fatalities. From 1996 to 2005, Native Americans comprised from 13.5 to 20.1 percent of the states fatalities. Approximately 65 percent of these fatalities were alcohol-related. Montana's tribal nations recognize the critical importance of highway safety and are actively participating in the identification and implementation of safety strategies on tribal lands.

						NHTSA <sup>1</sup>	AASHTO <sup>2</sup>
49.	Indian Reservation Road Program	Craig Genzlinger (FHWA)	FHWA	BIA	Funding for safety improvement projects on tribal lands		
50.	Highway Safety Improvement Program  (Encompasses former Safety Engineering Improvement Program (SEIP) and Hazard Elimination Safety Program (HES))	Traveler Safety Policy Paper, TRANPLAN 21 – 2002 Update  Safety Engineering Improvement Program (seven-page document by Safety Management Section)	MDT Engineering, Traffic and Safety Bureau	MDT Engineering; Safety Management Section	The Highway Safety Improvement Program provides funds for safety improvements on all public roads and highways. These funds serve to eliminate or reduce the number and/or severity of traffic accidents at high accident locations and to encourage engineering improvements that address identified safety needs (based on crash data identified by state, county, local, and Federal ownership and identified by location and severity).  While not specifically targeted to Native American crashes, HSIP projects can improve roadway conditions and eliminate hazards that contribute to crashes involving Native Americans.	Specific to each project/ treatment (Vol. 6)	

**NOTE:** Participants of Reduce Native American Fatal Crashes Action Team should review: *Traffic Accident Reporting on Indian Reservations in Montana (TARS)*, by Cordell Ringel for the Western Transportation Institute, July 2003. *Montana Tribal Safety Conscious Planning Forum Report*, Montana Department of Transportation and Federal Highway Administration, prepared by Cambridge Systematics, June 2005.

<sup>1</sup> Effectiveness evaluation taken from: Hedlund, James. Countermeasure That Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices, NHTSA/GHSA, 2005. Strategy reference is shown in parentheses.

<sup>2</sup> Effectiveness evaluation taken from: AASHTO Strategic Highway Safety Plan. Report 500 Series, Volume 11 (Seatbelt Use), NCHRP. Strategy reference is shown in parentheses.

# **Native American Crashes**

## *New Strategies*

<b>CHAMPION:</b> <b>NAME:</b> Henri Headdress, <b>Transportation Planner</b> <b>E-mail:</b> <b>hheaddress@fortpecktribes.org</b> <b>Phone 406-768-5155 ex.321</b> <b>Assistant: Cordell Ringel,</b> <b>Transportation Consultant</b> <b>Phone: 406-652-6198</b> <b>E-mail: cordellr3@bresnan.net</b>	<b>Sponsoring Agency</b>	<b>Agency Contact</b>	<b>Implementation Approach- Action Steps-When?</b>	<b>Agency Planning Documents or Procedures</b>	<b>Coordination/ Outreach Efforts</b>	<b>Funding Approach/ Needs/Sources</b>	<b>Implementation Oversight</b>	<b>Reporting Requirements</b>	<b>Evaluation/ Assessment Procedure</b>
<b>E. Reduce Native American Fatal Crashes</b>				<b>Implementation Team: The Implementation team will be made up of several individuals including representatives from the following: MDT (Planning and Safety Offices), MHP, FHWA, one representative from each tribal government (tribal council) and varies other specialist as may be needed to address the different strategies. Note: This team will be unique because of the different strategies to be addressed. One person will be assigned as the team leader and be responsible for leading the team. Some strategies will require a tribal specific implementation team for each tribal government and reservation.</b>					
<b>NA-2 Systems/Policies to Support Data Sharing among Tribal, State, Local Entities (8 votes)</b> Facilitate procedures, systems, and policies to support sharing and utilization of crash data among state, local, and tribal entities. Incorporate tribal data into statewide databases (Impaired Driving Assessment)	MDT -- The Implementation Team and specialists from MDT / FHWA / MHP / BIA and Tribal Law Enforcement	Chairman of the Implementation Team	Contact all Tribes to gain support and commitment to share traffic records data. Determine what crash data they are willing to share. Complete tribal surveys and analysis of CISCO software in use, needs for additional equipment / IT support, training, etc. to update current system or implement a new system. Continue working through the MDT/MHP liaison committee to move this initiative forward. Establish users group.	MDT Traffic Records Plan, Indian Highway Safety Program and Montana Comprehensive Safety Plan.	Tribal Governments MHP / MDT / IHSP / FHWA / NHTSA / MDT-SHTSO	Funding will be required to implement this objective. Several sources of funding may be available. The IHSP has already contributed funds, but the remainder may need to come from the MDT/NHTSA.	This will be under the direction of the Implementation Team with support from MHP / MDT, IHSP, Tribal Governments, Tribal Law Enforcement and BIA Law Enforcement.	Annual Report produced by each Tribe, MHP and MDT to produce statewide annual report.	(1) Number of Tribes contacted (2) Number of tribes with functioning traffic records systems (3) Number of reports accepted into the MHP database from each tribe/s (4) Number of reports submitted to Tribes
<b>NA-3 Cross-Deputization of Law Enforcement among Tribal, State, Local Entities (16 votes)</b> Develop sample agreements/policies to support cross-deputization of law enforcement among state, local, and tribal entities. (Action team suggestion) This will need to be addressed by the individual Tribal Governments for each tribe. Note: This will require an individual tribal team to be established by each tribe to address and consider this initiative.	MDT -- The Implementation Team and specialists from MHP / BIA Law Enforcement, DOJ, Tribal Law Enforcement, etc.	Designated Tribal Government team and tribal liaisons, (others to be determined by tribal team)	Contact all tribal governments individually to see if they are willing to consider a cross-deputization agreement. Present Fort Peck Tribes Agreement to tribal leaders using FP tribal leaders to explain the pros and cons of their agreement. For interested tribes, develop model agreement to start discussion. Work to complete an acceptable cross-deputization agreement with interested tribes.	Use Fort Peck cross deputization agreement as a reference document to present to each individual tribe. Interested tribes would have to develop their own tribal specific agreement with state and local governments.	This will require a major outreach effort to all tribes with extensive follow-up to tribes that indicate they may be willing to consider a cross-deputization agreement. Could also use the services of a former BIA Police Officer and Fort Peck Tribal Councilman who helped draft the FP Agreement.	Funding requirements for this project will include the travel and time required to meet with the individual tribes. For interested tribes, additional funds will be required to draft and finalize a cross-deputization agreement between tribal, local and state governments.	Implementation of this strategy will be dependent on the tribes desire to enter into such an agreement. Oversight will then involve many different organizations, i.e. tribal government, DOJ, MHP, local governments, and BIA or tribal law enforcement, etc.	Providing copies of new, draft and ultimately approved tribal agreements as they are developed and approved by the participating parties.	Evaluation of the agreements will be an ongoing evaluation process and will continue through out the length of each agreement. Evaluation will be by the individual Tribes, DOJ, MHP, and the other affected local governments.

<b>CHAMPION:</b> <b>NAME:</b> Henri Headdress, <b>Transportation Planner</b> <b>E-mail:</b> <b>hheaddress@fortpecktribes.org</b> <b>Phone 406-768-5155 ex.321</b> <b>Assistant: Cordell Ringel,</b> <b>Transportation Consultant</b> <b>Phone: 406-652-6198</b> <b>E-mail: cordellr3@bresnan.net</b>	<b>Sponsoring Agency</b>	<b>Agency Contact</b>	<b>Implementation Approach- Action Steps-When?</b>	<b>Agency Planning Documents or Procedures</b>	<b>Coordination/ Outreach Efforts</b>	<b>Funding Approach/ Needs/Sources</b>	<b>Implementation Oversight</b>	<b>Reporting Requirements</b>	<b>Evaluation/ Assessment Procedure</b>
<b>E. Reduce Native American Fatal Crashes (continued)</b>		<b>Implementation Team: HTSO Rep., Joan Cassidy (DPHHS), Myron Oats (Chippewa Cree Tribe), Cap. Jim Summers (Fort Peck Law Enforcement), Craig Genzlinger (FHWA), Henry Headdress, Transportation Planner, (Fort Peck Tribes), Henry Devereaux (MHP), Lori Ryan (Director’s Secretary), (MDT). Representation From All Tribal Governments.</b>							
<b>NA-6 Encourage adoption of Tribal Traffic Codes by all tribes. (6 votes)</b> Encourage all tribes to implement uniform traffic statutes that incorporate tribal statutes that are comparable with the Montana state statutes governing DUI, Per Se violations, and the suspension of driving privileges upon conviction or for refusal to comply with the Montana implied consent law. Note: This will require an individual tribal team to be established by each tribe to address and consider this initiative.	Tribal Governments, BIA and Tribal Law Enforcement Offices, MDT & MHP	Designated Tribal Government team and tribal liaisons, (others to be determined by tribal team)	Establish a individual tribal task force to review the tribes traffic codes and compare with Montana state statutes for DUI, Per Se violations, and the suspension of driving privileges upon conviction or for refusal to comply with the Montana implied consent law. Determine what changes could be made to bring more uniformity between tribal and state statutes. Refer these identified changes to the tribal council for consideration.	Tribal traffic codes and Montana state statutes.	Tribal and BIA Law Enforcement, Tribal governments, DUI taskforces, IHS, Tribal Courts and judges, community outreach.	Funding will be required to complete this strategy. Funding for will need to come from MDT to support this imitative, with in-kind support from the tribal governments.	MDT, Tribal Governments, tribal judges, etc.	Reports of meeting outcomes from the individual tribal governments will constitute a interim report of progress. Completion of tribal traffic codes by each individual tribal government that are compatible with the state codes will represent a final report.	Evaluation will consist of (1) number of tribal traffic codes established and (2) number of tribal traffic codes that have specific statues that are comparable to the Montana statutes that cover DUI, Per Se violations, and the suspension of driving privileges upon conviction or for refusal to comply with the Montana implied consent law.
<b>NA-13 POST Credits for Tribal and BIA Officers Through Consideration of Tribal/MHP Agreements (7 votes)</b> Improve communication with Police Officers Standards and Training (POST) so that Tribal and BIA officers receive Montana POST credits for their training. (Tri-Party Gathering suggestion)	Allen Horsfall, POST Executive Director, MHP/MDT, Tribal and BIA Law Enforcement	Designated team of Post, BIA and Tribal law enforcement officers	Establish a small task force of key MHP, BIA and Tribal Law Enforce individuals to work with the Executive Director, Allen Horsfall, Director of the Montana POST to determine what is required for Tribal and BIA officer to become certified with POST credits. Work with POST to establish a criteria and set of standards to be met by tribal / BIA law enforcement officers to become POST certified. Complete within the next year.	POST, BIA and MHP to provide background and documentation to support this task.	POST Executive Director, representative from BIA Law Enforcement, Tribal Law Enforcement, and MHP.	POST, MHP, BIA and MDT.	POST, MHP and BIA Law Enforcement.	Provide a report outlining the requirements needed to obtain POST credits and/or a position paper explaining why the POST credits cannot be obtained by BIA and Tribal officers and the reasons why. Also explain what actions that can be taken in the future to qualify for POST credits.	Annual Report showing the number of tribal and BIA officers which applied for POST credits and how many were granted or denied in each calendar year.

CHAMPION: NAME: Henri Headdress, Transportation Planner E-mail: hheaddress@fortpecktribes.org Phone 406-768-5155 ex.321 Assistant: Cordell Ringel, Transportation Consultant Phone: 406-652-6198 E-mail: cordellr3@bresnan.net	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementation Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
E. Reduce Native American Fatal Crashes (continued)		Implementation Team: HTSO Rep., Joan Cassidy (DPHHS), Myron Oats (Chippewa Cree Tribe), Cap. Jim Summers (Fort Peck Law Enforcement), Craig Genzlinger (FHWA), Henry Headdress, Transportation Planner, (Fort Peck Tribes), Henry Devereaux (MHP), Lori Ryan (Director's Secretary), (MDT). Representation From All Tribal Governments.							
<b>NA-11/15 Comprehensive Safety Plans for Each Reservation Incorporating or being led by DUI Task Forces (17 votes)</b> Encourage all reservations to develop their own comprehensive safety plan to strengthen traffic safety coordination on the reservations and improve ability to access grant funds. (Tri-Party Gathering suggestion)	MDT-SHTSO, Tribal Government, IHS, local Law enforcement, tribal transportation planners, etc.	Sandy Straehl and Pricilla Sinclair (MDT), Cordell Ringel (consultant), individual tribal safety committee chairman.	Set up meeting with the Tribal Government to explain the purpose, benefits, and to get support for a Tribal Comprehensive Safety Plan. Explain the potential benefits and how it correlates with the state's CHSP. Identify potential participants for the safety committee. Organize committee and hold regular meetings. Set clear objectives and promote safety through the tribal communities.	Use MDT CHSP as a model. Develop a tribal planning document after the committee is organized to reflect the specific needs of the tribes.	Tribal government, other governmental organizations, community organizations and/or districts, schools, etc.	Formalize committee so it is organized with, bylaws and or some type of charter, i.e. DUI Taskforce. Seek funding through NHTSA, MDT-SHTSO, MDT, IHS, DUI, CDC, schools and tribal resources to support committee organization, planning and operation.	Implementation would occur once approval is obtained from the tribal government and a funding source is identified and bylaws are written and the committee starts functioning effectively.	Quarterly reports to the tribal government and to the funding organization as required in the grants. Annual report to the tribal government and to the community. Annual report showing accomplishments and increased emphasis on tribal safety.	Evaluation would be on a year to year basis comparing the changes in specific safety objectives, such as, change in the number of DUI's, fatalities, injuries, seat and child restraint usage, traffic citations, etc. Based on this information, adjustments would be periodically made in specific emphasis areas to improves the effectiveness of the committee.

## **Emphasis Area #4. Single Vehicle Run-Off-The Road Crashes**

**Champion: MDT Engineering**

**Objective: Reduce and Mitigate the Consequences of Single Vehicle Run-Off-the-Road Fatal and Incapacitating Injury Crashes.**

**Performance Measures:**

- **Total annual single vehicle run-off-the-road crashes; and**
- **Total annual single vehicle run-off-the-road fatal crashes.**

In Montana, crash reports do not have a specific code for “run-off-the-road” crashes although collisions with fixed objects, overturns and immersion, and single vehicle crashes are assumed to involve “run off the road.” From 1995 to 2004, 27 to 30 percent of all crashes in Montana involved a single vehicle running off of the road. During the same period, from 48 to 60 percent of Montana’s fatal crashes involved a single vehicle running off of the road. Montana’s high proportion of rural vehicle miles of travel on low-volume roads at typically high speeds makes this a particularly critical traffic safety issue for the State. New strategies to reduce these crashes focus on roadway design and greater public awareness of this highway safety issue.

B. Reduce and mitigate the consequences of single vehicle run-off-the-road fatal and incapacitating injury crashes (continued)	Implementation Team: MDT-Planning, NHTSA, Bobbi Perkins (DPHHS). Plus any others with expertise or interest.								
<b>LD-1 Comprehensive, Multiagency Policy in High-Incidence Locations (25 votes)</b> Develop a comprehensive, multidisciplinary, multiagency policy for addressing areas with a high incidence of lane departure crashes to be implemented during 3R projects, new construction, and during routine maintenance. The policy should address lane width, pavement marking, etc. by facility type. The safety features also should be implemented in areas not identified as “high-accident locations and corridors” as other issues, e.g., maintenance, restoration, etc. are being addressed. (Action team/ Consultant suggestion)	MDT	Pierre Jomini	Establish a Road Safety Audit program -2 processes (programmed project and high-crash corridor)	New Procedure Document	Implementation team	New FTE’s will be needed to carry out RSAs	Preconstruction Engineer	Winter 2007	
	MDT	Pierre Jomini	Review one-mile segments for single vehicle crashes involving an incapacitating injury or a fatality.	Annual Report to FHWA.	District, FHWA, overlap with seat belt and alcohol/ drug	Need FTE for project identification, HSIP funds for programmed projects.	Transportation commission for projects, FHWA for project approval, and the comprehensive safety plan work groups	Yearly	
<b>LD-6 Targeted Public Awareness Campaigns Re: Single Vehicle ROR Crashes in Montana (26 votes)</b> Conduct targeted public awareness campaigns to publicize the unique issue of single-vehicle ROR crashes in Montana and their contributing factors, including dangers of cruise control (Action Team suggestion)	MDT	Priscilla Sinclair	Incorporate ROR safety messages into existing campaigns.	HSP	Work with media as well as staff to address key safety concerns.	NHTSA	MDT-SHTSO	NHTSA/CHSP Committee	Reduction in ROR crashes.

# Emphasis Area #5. Traffic Records Management

**Champion:** Jack Williams (State Highway Traffic Safety Office)

**Objective:** Develop and Implement A Comprehensive, Coordinated Transportation Records and Crash Reporting, Data Management, and Analysis System, Accessible To All Stakeholders, to Manage and Evaluate Transportation Safety.

**Performance Measures:**

- **Implementation of specific CHSP strategies for traffic records management; and**
- **Implementation of specific strategies contained in Traffic Records Strategic Plan**

In early 2004, the MDT-SHTSO asked NHTSA to facilitate a traffic records assessment. This assessment was conducted with a team of traffic records professionals, covering all data systems comprising Montana's traffic records system. The resulting Traffic Records Assessment report identified an extensive number of recommendations to improve the State's record keeping systems. In order to respond to these recommendations, Montana has recently completed the preparation of a Traffic Records Strategic Plan. A number of the strategies contained in this Plan have been incorporated into the CHSP to further facilitate their implementation.

						NHTSA <sup>1</sup>	AASHTO <sup>2</sup>
1.	Montana Traffic Records Strategic Plan (MT-TRSP)	State of Montana Traffic Records Strategic Plan – Final Report (February 6, 2006)	Montana Department of Transportation (MDT)/ MDT State Highway Traffic Safety Office (MDT-SHTSO)	Traffic Records Coordinating Committee (TRCC), MDT-SHTSO and other state agencies	Guiding document for statewide Traffic Records Coordinating Committee (TRCC) (stakeholders of state crash records); purposes of MT-TRSP: <ul style="list-style-type: none"> <li>• Fulfill the requirements of the Montana Traffic Records Assessment (TRA);</li> <li>• Provide Montana state agencies with a common basis for moving ahead with traffic records systems upgrades, integration, and data analysis; and</li> <li>• Provide a basis for Montana’s grant requests to the National Highway Traffic Safety Administration (NHTSA) to receive first-year and successive-year grants under Section 408 (Title 23).</li> </ul>		
2.	Montana Accident Records System (MARS)	State of Montana Traffic Records Strategic Plan – Final Report (February 6, 2006)			Montana Crash Records System – populated by police accident reports, shared with Federally-mandated Fatality Analysis Reporting System (FARS) and (SAFETYNET); almost fully compliant with Model Minimum Uniform Crash Criteria (MMUCC) promoted by U.S. DOT.		
3.	MDT Road Inventory (Road Log)	State of Montana Traffic Records Strategic Plan – Final Report (February 6, 2006)	MDT-SHTSO	MDT-SHTSO	Contains roadway and intersection characteristics; contains basic information on geometric and traffic conditions on a segment-by-segment basis; and includes information on surface type, lane and shoulder widths, number of lanes, and average annual daily traffic (AADT).		
4.	TEAM 261 Initiative	State of Montana Traffic Records Strategic Plan – Final Report (February 6, 2006)	Multiple state, Federal, and business partners	Department of Justice	Guiding improvements and system upgrades to driver licensing, driver history, and vehicle registration data. New information system will upgrade the database from a main-frame-based to a server-based system and will provide wider and better access to data.  Initiative is considering capability to link driver citations with convictions from the court system.		

<sup>1</sup> Effectiveness evaluation taken from: Hedlund, James. Countermeasure That Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices, NHTSA/GHSA, 2005. Strategy reference is shown in parentheses.

<sup>2</sup> Effectiveness evaluation taken from: AASHTO Strategic Highway Safety Plan. Report 500 Series, Volume 11 (Seatbelt Use), NCHRP. Strategy reference is shown in parentheses.

**Priority – Develop and Implement a Comprehensive, Coordinated Transportation Records and Crash Reporting, Data Management, and Analysis System, Accessible to All Stakeholders, to Manage and Evaluate Transportation Safety (continued)**

						NHTSA <sup>1</sup>	AASHTO <sup>2</sup>
5.	National EMS Information System (NEMSIS) implementation	State of Montana Traffic Records Strategic Plan – Final Report (February 6, 2006)		Emergency Medical Services (EMS) and Trauma Systems (EMSTS) section of DPHHS	An Online Prehospital Information (OPHI) module is being developed to enable prehospital providers to collect electronic patient information. This data will provide comprehensive patient information about patients transported by ambulance and will complement information about patients with severe trauma which are already being tracked through a trauma register.		
6.	Montana Statewide EMS Program	State of Montana Reassessment of Emergency Medical Services, June 2005	NHTSA with Montana EMS and Trauma Systems (EMSTS) Section of Department of Public Health and Human Services (DPHHS)	EMSTS	Montana program consists of 5,000 EMS providers; 100 percent of Montana residents are served by 9-1-1 service. EMSTS is working to develop a comprehensive system for assessing, planning, developing, deploying, and coordinating EMS resources.  A reassessment of the program was conducted in June 2005 to measure progress since original assessment.		
7.	FullCourt System	State of Montana Traffic Records Strategic Plan – Final Report (February 6, 2006)	Judicial Branch Commission on Technology and the Commission on Courts of Limited Jurisdiction/FMCSA	Office of Court Administrator, Department of Justice	Will manage case loads and provide case histories, search capabilities, financial management, and court scheduling with tracking through citation-to-conviction process; currently underway.  FMCSA is providing funds to establish a central repository of Courts of Limited Jurisdiction case information.		
8.	Safety Management System (SMS)	State of Montana Traffic Records Strategic Plan – Final Report (February 6, 2006)	MDT-SHTSO and MDT Engineering	MDT-SHTSO and Traffic Safety Bureau	Compilation of crash records to assess high crash locations and crash characteristics; provides series of cross-tabulations.		

<sup>1</sup> Effectiveness evaluation taken from: Hedlund, James. Countermeasure That Work: A Highway Safety Countermeasure Guide for State Highway Safety Offices, NHTSA/GHSA, 2005. Strategy reference is shown in parentheses.

<sup>2</sup> Effectiveness evaluation taken from: AASHTO Strategic Highway Safety Plan. Report 500 Series, Volume 11 (Seatbelt Use), NCHRP. Strategy reference is shown in parentheses.

**Priority – Develop and Implement a Comprehensive, Coordinated Transportation Records and Crash Reporting, Data Management, and Analysis System, Accessible to All Stakeholders, to Manage and Evaluate Transportation Safety (continued)**

# **Traffic Records Management**

## *New Strategies*

CHAMPION: Name: Jack Williams E-mail: jawilliams@mt.gov Phone #: 444-3298	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementation Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
K. Develop and implement a comprehensive, coordinated transportation records and crash reporting, data management, and analysis system, accessible to all stakeholders, to manage and evaluate transportation safety			Implementation Team: Karen Nelson, Jim DeTienne, Greg Noose, Bill Cloud, Jesse Munro, Pierre Jomini plus other TRCC members,						
<b>DM-1 Implement Action Plan in TRSP</b> Implement Action Plan recommended in new Traffic Records Strategic Plan (Action Team suggestion) Facilitate support and cooperation necessary to submit grant application to NHTSA to fund implementation of Traffic Records Strategic Plan (Action Team suggestion) Ensure that the policy and funding support necessary are available to implement Traffic Records Strategic Plan (Action Team suggestion)	MDT-SHTSO	MDT-SHTSO Operations Research Analyst	Submit grant application on an annual basis gaining support from involved agencies. Implement by 6/15/2006 and by due dates in ensuing years.	Traffic Records Strategic Plan	Dept of Justice – Driver Control and MHP; DPHHS; Office of Court Administration; Office of Public Instruction; Local Law Enforcement; Local Courts; and Tribes	NHTSA Traffic Records Grant	MDT-SHTSO Officer	Annually via MDT-SHTSO to NHTSA	Grants Received
	MDT-SHTSO	MDT-SHTSO Operations Research Analyst	Implement Objectives within the Traffic Records Strategic Plan by priority determined by consultant and Implementation Team	Traffic Records Strategic Plan	Dept of Justice – Driver Control and MHP; DPHHS; Office of Court Administration; Office of Public Instruction; Local Law Enforcement; Local Courts; and Tribes	NHTSA Traffic Records Grant	MDT-SHTSO Officer	Annually via MDT-SHTSO to NHTSA	Show the progress that has been made on the objectives within the Strategic Plan
<b>DM-2 Electronic Data Capture</b> Electronic data capture. An initial program could be established by MDT with an agreement with MHP. MDT could buy the equipment and provide training. Perhaps a university or community college would want to take on this task – provide equipment installation, training, and on call technical assistance. Negotiations should begin with the largest police departments. Perhaps a goal of 85% electronic data capture over a couple of years. Ultimately, MHP could presumably take over the program and provide maintenance since all their personnel would be trained and out in the field anyway. (Consultant suggestion)	JUSTICE/MHP	MHP/Management Services Bureau Chief	Modify MHP electronic crash database so that it can receive electronic submission of crash reports. Develop any other software in order to move crash data electronically. MHP could offer guidance to local law enforcement in achieving submissions.	Traffic Records Strategic Plan	Dept of Justice/MHP; local law enforcement; MDT/SMS and MDT-SHTSO	NHTSA Traffic Records Grant	MDT-SHTSO Officer and MHP Chief	Annually via MDT-SHTSO to NHTSA when NHTSA funds involved, otherwise as deemed necessary by MHP	Progress on Implementing Objectives and the percentage of crashes received electronically.

CHAMPION: Name: Jack Williams E-mail: jawilliams@mt.gov Phone #: 444-3298	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementation Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
K. Develop and implement a comprehensive, coordinated transportation records and crash reporting, data management, and analysis system, accessible to all stakeholders, to manage and evaluate transportation safety (continued)			Implementation Team: Karen Nelson, Jim DeTienne, Greg Noose, Bill Cloud, Jesse Munro, Pierre Jomini plus other TRCC members,						
<b>DM-3 Data Warehouse</b> A data warehouse or linkage of some sort to provide “one stop shopping” so everyone knows where the data are. Then develop a program for local access by the MPOs, PDs, and others who would need access to the data to define their own problems and program their investments where the most serious safety problems exist. This would presumably necessitate MDT providing training on how to access and analyze the data. A community college or university might be available that has this capability. (Consultant suggestion)	MDT-SHTSO	MDT-SHTSO Operations Research Analyst	Implement Objectives within the Traffic Records Strategic Plan relating to linkage and data availability	Traffic Records Strategic Plan	Dept of Justice – Driver Control and MHP; DPHHS; Office of Court Administration; MDT; Office of Public Instruction; Local Law Enforcement; Local Courts; and Tribes	NHTSA Traffic Records Grant	MDT-SHTSO Officer	Annually via MDT-SHTSO to NHTSA	Show the progress that has been made on the linking of data and the availability of data to the organizations within the agencies listed in outreach.
<b>DM-4 Tribal Data Sharing</b> Keep working with the tribes to get 100% agreements in place to share crash data (without personal identifiers if need be). The agreements could be between MHP and the tribal police, MDT, or whomever. Even if they could get location, severity, and contributing factors, it would help a lot. This would entail first of all a “marketing program.” Crash data collection and data sharing can be linked with access to funding for road improvements, enforcement and education countermeasure support, and EMS deployment. The tribes might feel differently about sharing data if they understood that their people don’t need to die in traffic crashes. A key element to all this is a continuing partnership. (Consultant suggestion)	MDT/SMS; MDT-SHTSO; Justice/MHP	MDT Safety Management Supervisor	Implement Objective 2.6.2	Traffic Records Strategic Plan	Dept of Justice/MHP; MDT/SMS and MDT-SHTSO	MDT Planning Division and NHTSA Traffic Records Grant	MDT Planning Division Administrator and MDT-SHTSO Officer	Annually via MDT-SHTSO to NHTSA	Show progress being made on the number of Reservations submitting crash data to MHP and the development of software to interface into the MHP Crash system database

## Emphasis Area #6. Young Driver Crashes

**Champion:** David Huff (Montana Office of Public Instruction)

**Objective:** Reduce Young Driver (Under Age 21) Fatal and Incapacitating Injury Crashes

**Performance Measures:**

- Total annual young drivers in crashes;
- Annual young driver crash rate (per 1,000 licenses);
- Total annual young drivers in fatal crashes; and
- Annual young driver fatal crash rate (per 1,000 licenses).

In Montana, in 2005, drivers under the age of 21 experienced 117 crashes per 1,000 licenses and 0.61 fatal crashes per 1,000 licenses. This is triple the crash rate and 50 percent higher than the fatal crash rate for Montana drivers who are 21 and older. Graduated Drivers Licensing (GDL) requirements for new drivers go into effect July 1, 2006, which require seatbelt use, limit the hours of unsupervised driving, and restrict the number and age of non-family passengers. It is expected that the GDL program will reduce these rates. New strategies focus on programs to support GDL implementation and expansion of drivers education programs.

---

# Young Driver Crashes

## *Existing Programs*

# Priority – Reduce Young Driver (Under Age 21) Fatal and Incapacitating Injury Crashes

Strat. No.	EDUCATION Current Strategies	Reference Document	Funding Agency	Implementing Agency	Overview of Actions	Effectiveness	
						NHTSA <sup>1</sup>	AASHTO <sup>2</sup>
1.	Drivers' Education Curriculum – Montana Teen Driver Essential Knowledge and Skills Topics	Curriculum Map	OPI (Administrative Appropriation) and portion of driver license fees	Office of Public Instruction (OPI)	Drivers education curriculum being improved to incorporate behavioral changes to encourage safety belt usage by youth; 45 topics covering essential knowledge and skills.	None (Prelicensure Driver Education) (2.1)	
2.	Traffic Education Program	TRANPLAN 21 2002 Update; Traveler Safety Policy Paper <a href="http://www.opi.mt.gov/DriverEd/index.html">http://www.opi.mt.gov/DriverEd/index.html</a> OPI, Division of Health Enhancement and Safety Program Descriptions 2004	OPI (Administrative Appropriation) and portion of driver license fees	OPI	<ul style="list-style-type: none"> <li>Sets guidelines for curricula and requirements for driver education courses;</li> <li>Provides/sponsors driver education teacher training;</li> <li>Conducts periodic on-site review of high school driver-education programs;</li> <li>Develops media [public service announcements (PSAs)]</li> <li>Provides advanced driver education; and</li> <li>Promulgates rules regarding school bus safety and training.</li> </ul>	None (Prelicensure Driver Education) (2.1)	Vol. 14: Proven/Tried (6.1 D1) / Tried (6.1 D2)
3.	Montana Driver-In Vehicle Education/ Advanced Driving Program	<a href="http://www.opi.mt.gov/DRIVE/Index.htm">http://www.opi.mt.gov/DRIVE/Index.htm</a> OPI, Division of Health Enhancement and Safety Program Descriptions 2004	Funding from user fees (no appropriation, program approved by legislature each year)	OPI	DR.I.V.E. workshop is designed to enhance driver risk management skills, using behind-the-wheel training to increase risk awareness and enhance the participants' behaviors to better manage ordinary and critical driving situations. The One-Day Workshop is for first time participants. The Half-Day "Refresher" Workshop is for those individuals who have completed the One-Day Workshop and wish to refresh and enhance their driver risk management skills. A unique one-day teen workshop using the curriculum developed for the OPI/MDT/WTI Teen Driver research project is being added to the summer season DRIVE offerings.	Unknown (2.2)	
4.	Teen Driver Research Project	<a href="http://www.coe.montana.edu/wti/wti/display.php?id=179">http://www.coe.montana.edu/wti/wti/display.php?id=179</a>	MDT-SHTSO	OPI and Western Transportation Institute	First phase involved development of curriculum to teach defensive vehicle handling to novice drivers. In second phase (Summer 2005), a one-day course was offered to 200 teenage drivers who had been out of drivers education for 6 months. Effect of course on driver safety will be evaluated for 4 years and compared to driving records of 200 youth who did not complete defensive driving course.

YD-16 Develop a Role and Strategy for Law Enforcement in GDL (9 votes) (CTSP Committee suggestion)	Montana Highway Patrol	Colonel Paul Grimstad	Research and write recommendations for law enforcement in regards to GDL education with teens and parents and enforcement with teen drivers	Unknown	Office of Public Instruction; Montana Traffic Education Association; Montana Police Protection Association; Montana Sheriffs U and peace Officers Association; Montana Department of Justice MVD and AG	Unknown	Montana Highway Patrol	Distribute Recommendations to Law Enforcement agencies and education partners.	Review document with feedback from partners 6-12 months following distribution and update as needed.

## **Emphasis Area #7. High-Crash Corridors/High-Crash Locations**

**Champion:** MDT Engineering

**Objective:** Establish a Process to Reduce Crashes, Injury Crashes, and Fatal Crashes in Identified High-Crash Corridors and Locations.

**Performance Measures:**

- **Average annual number of crashes in identified high-crash corridors/locations; and**
- **Annual severity rate of crashes in identified high-crash corridors/locations.**

Various locations on Montana's roadways experience higher than typical crash and/or crash severity rates. In developing the CHSP, the TSB in conjunction with the State Highway Traffic Safety Office (MDT-SHTSO) identified the most dangerous highway corridors on the national and state road system in Montana. The purpose of this effort was to identify the State's most significant high-crash corridors and to then conduct an analysis of crash data to identify the predominant factors contributing to crashes in these locations. This information was then used to support the identification of specific countermeasures that could be applied these corridors.

# High-Crash Corridors/High-Crash Locations

*New Strategies*

CHAMPION: NAME: MDT-Engineering E-Mail: _____ Phone #: _____	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementation Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
Reduce and mitigate the consequences of crashes, injury crashes and fatal crashes in identified high-crash locations, high-risk rural roads, and railroad crossings.		Implementation Team: MDT-Maintenance, MDT-Planning, Hwy Patrol, FHWA, WTI. Plus any others with expertise or interest.							
<b>HC-1/HC-2 Review Guidelines for Pavement and Shoulder Widths/ Review side Slopes (12 votes).</b> Review guidelines/ design standards for pavement and shoulder widths on reconstruction projects on state-maintained highways with speed limits greater than 45 mph. Provides recovery area and allows installation of rumble strips, safety for bikers/ joggers, and reduction in run-off-the-road crashes. (MDT Engineering suggestion) Review design standards for side slopes to allow for better recovery and less chance of rollover. Review side slopes on reconstruction and slope flattening projects on state-maintained highways. (MDT Engineering suggestion)	MDT	Duane Williams/ Paul Ferry/ Lloyd Rue (resource)	Geometric Design standards review; i.e., slopes, intersection channelization and control, etc.	RDM/TEM	MDT Engineering, Maintenance, Planning. FHWA, Highway patrol	Staff using over-head to determine a procedure	Chief/Preconstruction Engineer	Summer 2007	
<b>HC-4/HC-5 Six-Inch Pavement Markings/Longer-lasting pavement markings (7 votes)</b> Develop guidelines (that consider functional classification, ADT, crash history, etc.) for application of six-inch pavement markings that will increase roadway delineation. (MDT Engineering suggestion) Apply longer-lasting pavement markings that better withstand anti-icing, sanding, deicing, and snow plowing. Research project has been recommended. (MDT Engineering suggestion)	MDT	Duane Williams	Evaluate pavement marking materials – signing materials, Centerline rumble strips	Pavement Marking Policy/Rumble strip policy	MDT Planning/ Maintenance/ Engineering, FHWA,	Maintenance and project-specific funds	Chief/Preconstruction Engineer, Maintenance Administrator	Summer 2007	

CHAMPION: NAME: MDT-Engineering E-Mail: _____ Phone #: _____	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementation Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
Reduce and mitigate the consequences of crashes, injury crashes and fatal crashes in identified high-crash locations, high-risk rural roads, and railroad crossings. (continued)		Implementation Team: MDT-Maintenance, MDT-Planning, Hwy Patrol, FHWA, WTI. Plus any others with expertise or interest.							
<b>HC-8 Road Safety Audits (9 votes)</b> Evaluate procedures utilized for road safety audits and revise procedures for future audits to provide MDT, law enforcement, and other stakeholders with best possible information to implement safety improvements/enhancements. (MDT Engineering suggestion)	MDT	Pierre Jomini	Establish a Road Safety Audit program – 2 processes (programmed project and high-crash corridor)	New Procedure Document	Implementation team	New FTE’s will be needed to carry out RSAs	Preconstruction Engineer	Winter 2007	
<b>HC-11 ITS Technologies (11 votes)</b> Explore the use of, and implement, ITS technologies to enhance highway traffic safety. (MDT Engineering suggestion)	MDT	Duane Williams	Have an ITS discussion on projects with construction, reconstruction, or pavement overlays.	Memo	MDT engineering	The ITS applications will be funded by the individual projects.	Chief Engineer/ Preconstruction Engineer	Implementation Memo signed	
	MDT	Danielle Bolan	Have ITS toolbox available for project engineers		MDT Engineering, Maintenance, Planning. FHWA, WTI	PL/PR funds	Preconstruction Engineer/Traffic and Safety Engineer	January 2007	
<b>HC-12 Proactive Safety Efforts (21 votes)</b> Develop guidelines that will allow MDT to proactively and rapidly rather than reactively implement quick turn-around safety betterments. (MDT Engineering suggestion)	MDT	Duane Williams/ Lloyd Rue (resource)	Explore a method where a small number of projects or studies can be proactively initiated i.e., corridor slope flattening, approach side slopes, horizontal curves, intersection treatment	Procedure Memo	MDT Engineering, Planning, FHWA,	Determine potential yearly amount from HSIP funds or other funding source or both.	Chief/Preconstruction Engineer	Summer 2007	
Reduce and mitigate the consequences of crashes, injury crashes and fatal crashes on high-risk rural roads	MDT	Pierre Jomini	Identify crash sections within range and township with higher number of crashes. Review the location and prioritize feasible countermeasures to compete with safety funds available.	Annual report to FHWA	County, MDT planning and engineering	Requirement of SAFETEA-LU	Transportation commission for project approval	Annual report to FHWA	
Reduce and mitigate the potential for crashes at rail/highway intersections	MDT	John Althof	In addition the current ranking system for potential new projects, add a crash history element the selection of projects.	MDT Procedure Manual	MDT engineering	HSIP railroad funds	Chief/ Preconstruction engineer	Annual report to FHWA	Procedure Manual has been revised

# Emphasis Area #8. Truck Crashes

**Champion:** Drew Livesay (MDT Motor Carrier Services Division)

**Objective:** Reduce Fatal and Incapacitating Injury Crashes Involving Trucks

**Performance Measures:**

- Total annual crashes involving trucks;
- Total annual fatal crashes involving trucks; and
- Annual crashes involving trucks as a percent of all crashes.

In Montana, trucks are involved in approximately five percent of all crashes but slightly over nine percent of all fatal crashes. In 2005, the number of truck crashes and fatal truck crashes increased over the previous year. New strategies to address truck crashes include increased enforcement and inspection and an expanded safety training program.

<b>TC-1 Survey Motor Carrier Industry to Develop Training Program</b> Survey Montana’s commercial motor carrier industry and other individual and group “truck” stakeholders to learn what no cost MDT-provided safety training is desired and how to most effectively provide the desired training. Develop a statewide safety training program based on survey results and begin providing training statewide during spring 2008.	MDT/MCS	MCS MCSAP Program Manager	Develop Survey; evaluate survey results; develop training program reflecting survey results; provide state-wide training. Implement by 04/30/2008.	Montana’s Annual Commercial Vehicle Safety Plan (CVSP)	Montana’s Motor Carriers Association; Montana Highway Patrol; Federal Motor Carrier Safety Administration (FMCSA)	Montana’s MCSAP Grant	MCS Division Administrator	Quarterly via MCSAP reports to the FMCSA; Annually via Montana’s CVSP.	Written evaluation of training provided by training recipients after completion of each training session, statewide.
<b>TC-2 CVSA Safety Inspection Certification</b> Improve truck enforcement by reducing the average time needed for an MCS Officer to attain Commercial Vehicle Safety Alliance (CVSA) safety inspection certification from 24 to 12 months.	MDT/MCS	MCS Enforcement Bureau Chief	Obtain Montana Law Enforcement Academy (MLEA) approval; Merge MLEA and CVSA Officer training schedules; Implement by 1/31/2007	MCS Officer Training and Certification Program	Montana Law Enforcement Academy; Commercial Vehicle Safety Alliance; Federal Motor Carrier Safety Administration.	Montana’s MCSAP Grant; MCS Budget	MCS Division Administrator	Quarterly via MCSAP reports to the FMCSA; Annually via Montana’s CVSP.	Number of MCS officers attaining CVSA certification, annually compared with calendar year 2005 baseline.
<b>TC-3 CVSA Safety Compliance Certification</b> Improve truck enforcement by reducing the average time needed for a Motor Carrier Safety Assistance Program (MCSAP) inspector to attain Commercial Vehicle Safety Alliance (CVSA), safety compliance review and safety audit certification from 24 to 16 months.	MDT/MCS	MCS MCSAP Program Manager	Streamline compliance review and safety audit certification process for newly hired MCSAP inspectors. Implement by 6/30/2007.	MCSAP Inspector hiring and training program policies, guidelines and schedules.	CVSA and FMCSA	Montana’s MCSAP Grant; MCS Budget	MCS Division Administrator	Quarterly via MCSAP reports to the FMCSA; Annually via Montana’s CVSP; Annually via Montana’s New Entrant Plan.	Number of MCSAP inspectors attaining CVSA, Compliance Review, and Safety Audit certifications annually compared with calendar year 2005.
<b>TC-4 Train New Commercial Carriers</b> Train new commercial carriers to comply with state and Federal safety laws and regulations. Professionally evaluate the benefits of training provided over a 5-year period. Report evaluation findings.	MDT/MCS	MCS MCSAP Program Manager; Sage Inc. (contracted services provider); Western Transportation Institute (WTI) evaluator. Completed by 09/30/2009	As described in the MDT/Sage contract; As described in the WTI Contract.	MDT/Sage contract; MDT/WTI contract.	New Montana-based carrier’s; Federal Motor Carrier Safety Administration.	Montana’s New Entrant MCSAP Grant	MCS Division Administrator	Quarterly via MCSAP reports to the FMCSA; Annually via Montana’s CVSP; Annually via Montana’s New Entrant Plan.	Evaluation of program and formal report provided by WTI at the completion of the program.

# Emphasis Area #9. Emergency Medical Services Delivery

**Champion:** Jim DeTienne (EMS and Trauma System Section, Montana Department of Public Health and Human Services)

**Objective:** Develop an Effective and Integrated Emergency Medical Services (EMS) Delivery System.

**Performance Measures:**

- **Implementation of CHSP EMS strategies; and**
- **Implementation of EMS strategies contained in Montana EMS System Plan.**

Although Emergency Medical Services do not affect the number of crashes, they play a critical role in addressing the results of crashes. EMS providers face particularly challenging conditions within Montana due to the size of the coverage areas, distances from dispatching and treatment facilities, and severe weather conditions during winter months. In addition to these issues, the system is experiencing a shrinking number of volunteers and problems specific to rural areas such as lack of training opportunities and inadequate communications systems. New strategies to improve emergency medical services delivery in support of highway safety are consistent with the recent Montana EMS System Plan prepared by the Department of Public Health and Human Services.

---

# **Emergency Medical Services Delivery**

## *Existing Programs*

Priority – Develop an Effective and Integrated Emergency Medical Services (EMS) Delivery System

Strat. No.	EDUCATION Current Strategies	Reference Document	Funding Agency	Implementing Agency	Overview of Actions	Effectiveness	
						NHTSA <sup>1</sup>	AASHTO <sup>2</sup>
1.	Hospital-based intervention and screening programs	Impaired Driving Assessment	Hospitals	Hospitals	Four Level II trauma center hospitals – utilize brief intervention strategy with patients in ED or Trauma Wards; patients encouraged to recognize risks of DUI and moderate their alcohol consumption.	Proven (alcohol screening and brief intervention) (5.4)	Proven
2.	Brief Screenings and Interventions		EMS	Regional Trauma Task Forces	Doctors are trained to intervene with patients who have been admitted due to alcohol related crashes		
3.	Regional Trauma Task Forces		Local hospitals	Local hospitals	Regional teams are formed to plan strategies for the reduction of trauma within their region

CHAMPION: NAME: _____ E-mail: _____ Phone #: _____	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementatio n Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
<b>L. Develop an effective and integrated Emergency Medical Services (EMS) delivery system</b>									
<b>EM-1 System Component - Legislation and Regulation</b> Provide legislation and regulation to adequately support the EMS System.	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Continue to support the activities of the State EMS System Task Force.  2. Implement legislation which broadens the definition of where EMTs can practice (i.e., emergency room)  3. Implement EMS service licensing rules which promote a consultation/ strategic planning process	Montana EMS System Plan	EMS System Task Force  State Trauma Care Committee  Montana Hospital Association  Board of Medical Examiners, Department of Labor  Montana EMS Association	General Funds  CDC Block Grant Funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Quarterly meetings of the task force and trauma care committee to assess priorities and progress
<b>EM-2 System Component - Funding</b> Provide stable funding to adequately support the EMS System.	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Pursue ‘permanent’ state funding to adequately fund EMS system and EMS service activities.  2. Partner with Western EMS Network and other projects to support financial stability of EMS services  3. Implement funding to support recruitment and retention workforce issues.	Montana EMS System Plan	EMS System Task Force  State Trauma Care Committee	General Funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Adoption of funding and legislation strategies as approved by the Department EPP process.

CHAMPION: NAME: _____ E-mail: _____ Phone #: _____	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementatio n Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
<b>L. Develop an effective and integrated Emergency Medical Services (EMS) delivery system (continued)</b>									
<b>EM-3 System Component – Medical Response to Disaster</b> Minimize death, suffering and long-term medical effects from disasters and other mass casualty events through planning, knowledge of system resources and coordination of the medical response. <ul style="list-style-type: none"><li>Develop a statewide disaster response and mutual aid system for medical events.</li><li>Develop an electronic resource and disaster management system.</li></ul>	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	<ol style="list-style-type: none"><li>Develop a Medical Response Team infrastructure.</li><li>Insure all EMS services have mutual aid plans which formalize local, regional, and statewide disaster response.</li><li>Develop and implement the Health Information and Resource Management System database</li><li>Provide disaster medicine, NIMS and mutual aid response education to all EMS services</li></ol>	Montana EMS System Plan	EMS System Task Force  Emergency Preparedness Bureau, DPHHS  Disaster and Emergency Services, Dept. of Military Affairs	HRSA Hospital Bioterrorism Grant Funds DES Homeland Security Grant Funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Meetings with Idaho and Region 8 – adoption of a plan for regional DMAT.  Adoption of an implementation plan for state medical response teams.  Deployment of the Montana Healthcare Mutual Aid System module in HIRMS.  Deployment of the Resource Management module in HIRMS.  Numbers of person training in NIMS courses, esp. ICS 100, 200, and 700.
<b>EM-4 System Component – Human Resources</b> Ensure qualified, knowledgeable, and skilled emergency medical services personnel are available in sufficient numbers throughout the State. <ul style="list-style-type: none"><li>Assess alternate training strategies to enable more accessible EMS courses</li><li>Assess and implement alternate training strategies to enable more accessible EMT education</li><li>Assess and implement strategies to enable other healthcare providers to help meet prehospital workforce issues.</li></ul>	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	<ol style="list-style-type: none"><li>Assess what bridge courses will enable other health care providers to service as EMS field providers (e.g., nurses, lab techs, respiratory techs.)</li><li>Develop community education which helps support EMS recruitment and retention.</li><li>Survey EMS providers to determine workforce challenges and issues – develop strategies.</li></ol>	Montana EMS System Plan	EMS System Task Force  Board of Medical Examiners	General Funds CDC Block Grant Funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Completion of survey of EMS services about workforce issues.  Completion of survey of EMTs about workforce issues.  Deployment of public information toolkits to all EMS services.

CHAMPION: NAME: _____ E-mail: _____ Phone #: _____	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementatio n Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
<b>L. Develop an effective and integrated Emergency Medical Services (EMS) delivery system (continued)</b>									
<b>EM-5 System Component - Education System</b> Ensure qualified, knowledgeable, and skilled emergency medical services personnel are available in sufficient numbers throughout the State. <ul style="list-style-type: none"><li>Assess alternate training strategies to enable more accessible EMS courses</li><li>Assess and implement alternate training strategies to enable more accessible EMT education</li></ul>	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Assess and utilize alternate training methods, i.e., distance learning, telemed, Internet.  2. Utilize patient care data to assess and implement training needs.	Montana EMS System Plan	EMS System Task Force  Board of Medical Examiners  Montana State University	General Funds  CDC Block Grant Funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Deployment of Learning Center module in HIRMS.  Deployment of distance learning programs and numbers of people trained.
<b>EM-6 System Component - EMS Services</b> Ensure that Emergency Medical Services personnel and equipment are delivered to the scene in a safe and timely manner; and, as necessary, patients are transported at an appropriate level of care to and between appropriate facilities. <ul style="list-style-type: none"><li>Implement Emergency Vehicle Operator education.</li><li>Develop and implement a performance improvement-based EMS service inspection and technical assistance process.</li><li>Assess solutions to patient transportation issues, especially for interfacility transports.</li></ul>	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Promote attendance to the Lewistown and Helena advanced driving courses.  2. Evaluation and implement other emergency driving education strategies such basic courses, simulators and 'black boxes'.  3. Develop and implement service manager meetings and education.  4. Survey issues with inter-facility transport and develop strategies to lesson staffing issues with long transports.	Montana EMS System Plan	EMS System Task Force Office of Public Instruction Montana Hospital Association	General funds CDC Block grant funds Rural Health Policy Flex grant funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Numbers of persons attending driving courses. Regional meetings of service managers. Annual service manager conference.

CHAMPION: NAME: _____ E-mail: _____ Phone #: _____	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementatio n Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
<b>L. Develop an effective and integrated Emergency Medical Services (EMS) delivery system (continued)</b>									
<b>EM-7 System Component – Communications</b> Provide for a communications system that encompasses public access to EMS, interagency communications, medical control and coordination of resources.  • Develop an EMS Communications Plan to guide development and implementation of EMS communications.	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Develop an EMS Communications Plan.  2. Develop and implement EMS communications education, especially for P-25 systems.  3. Implement statewide emergency medical dispatch standards and education.	Montana EMS System Plan	EMS System Task Force	HRSA Hospital Bioterrorism Grant Funds  DES Homeland Security Grant Funds	EMS&TS Section, DPHHS  State P-25 consortiums	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Adoption of a state communications plan. Purchase of P-25 radio systems for hospital and EMS services.
<b>EM-8 System Component – Public Education and Information</b> Increase public awareness of the role of Emergency Medical Services, the appropriate means to access and utilize the system, and effective ways to prevent injury and acute illness.  • Develop and implement EMS service PI&E programs for recruitment and retention.  • Develop and distribute public PI&E programs to support EMS systems.	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Develop toolkits about EMS recruitment and retention for EMS services.  2. Develop and distribute public information resources for EMS services to utilize locally.	Montana EMS System Plan	EMS System Task Force  Highway Traffic Safety	CDC Block Grant funds  Highway Traffic Safety grant funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Toolkit to all EMS services. Development and distribution of various PI&E materials to EMS services.
<b>EM-9 System Component – Injury Prevention</b> Increase public awareness of the role of Emergency Medical Services, the appropriate means to access and utilize the system, and effective ways to prevent injury and acute illness.	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Develop injury prevention PI&E resources for local areas to utilize.  2. Support primary seatbelt and other appropriate legislative strategies.	Montana EMS System Plan	EMS System Task Force  State Trauma Care Committee  EMSTS Injury Prevention Coordinator	General Fund  MCH Partnership grant funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Development and distribution of various injury prevention materials to EMS services.

CHAMPION: NAME: _____ E-mail: _____ Phone #: _____	Sponsoring Agency	Agency Contact	Implementation Approach- Action Steps-When?	Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementatio n Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
<b>L. Develop an effective and integrated Emergency Medical Services (EMS) delivery system (continued)</b>									
<b>EM-10 System Component – Medical Direction</b> Assure physicians are consistently involved and provide leadership at all levels of the EMS system. <ul style="list-style-type: none"><li>• Develop strategies to support medical director education.</li><li>• Develop strategies to recruitment and retention of medical directors.</li></ul>	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Develop and implement alternate technologies to education medical directors about their roles and responsibilities.  2. Assess strategies to provide support to medical directors (e.g., regional mentors, statewide medical director).  3. Assess strategies to provide medical directors with better compensation and liability protection.	Montana EMS System Plan	EMS System Task Force  BOME, Medical Director Subcommittee	CDC Block Grant funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Development and implementation of service medical director training program.
<b>EM-11 System Component – Trauma System and Facilities</b> Provide a quality, effective system of trauma care and injury prevention integrated with the overall EMS system. Assure that patient needs are identified early and transfer to an appropriate level of care is accomplished in a timely manner. Evaluate how to facilitate better integration of the EMS and trauma systems.	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Evaluate strategies to enable EMS providers to become more involved in RTAC and other trauma system activities.  2. Evaluate methods to increase quality improvement between EMS services and facilities and between small facilities and large facilities.  3. Develop and Central Medical Dispatch System.  4. Evaluate continue implementation of the State’s Public AED program.	Montana EMS System Plan  Montana Trauma System Plan	EMS System Task Force  State Trauma Care Committee  American Heart Association	HRSA Hospital Bioterrorism Grant Funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Update of state AED legislation in ‘07 session. Deployment of Central Medical Dispatch module in HIRMS.
<b>EM-12 System Component – Information System</b> Provide for a comprehensive data collection and information systems to enable system evaluation and performance improvement.	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Develop and implement a statewide patient care database.  2. Continue to support the statewide trauma register.  3. Assess and implement data linking process which support evaluation and performance improvement.	Montana EMS System Plan	EMS System Task Force  State Trauma Care Committee	HRSA Hospital Bioterrorism grant funds CDC Block Grant funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Deployment of On-line Prehospital Information System module in HIRMS. Implementation of a data linking project for prehospital, trauma register, crash and Medicaid records.

Agency Planning Documents or Procedures	Coordination/ Outreach Efforts	Funding Approach/ Needs/Sources	Implementatio n Oversight	Reporting Requirements	Evaluation/ Assessment Procedure
L. Develop an effective and integrated Emergency Medical Services (EMS) delivery system (continued)									
EM-13 System Component – Evaluation Provide for a comprehensive quality management program that improves planning, implementation and monitoring of a statewide EMS system.	EMS&TS Section, DPHHS	Jim DeTienne, Supervisor	1. Institutionalize user-friendly reports and data queries from Section databases.  2. Develop various methods and reports which interpret successes and opportunities for improvement in the EMS and Trauma systems.	Montana EMS System Plan	EMS System Task Force  State Trauma Care Committee	General Funds  HRSA Partnership grant funds	EMS&TS Section, DPHHS	Quarterly to EMS System Task Force and State Trauma Care Committee as appropriate	Deployment of QI reports in OPHI. Distribution of various quality improvement reports to EMS task force, state trauma care committee and regional trauma advisory committees.

# Emphasis Area #10. Urban Area Crashes

**Champion:** To be determined

**Objective:** Reduce Fatal and Incapacitating Injury Crashes in Urban Areas.

**Performance Measures:**

- Total annual urban fatal crashes; and
- Growth rate in urban fatal crashes (one- and five-year).

Although rural crashes comprise the majority of fatal crashes in Montana, slightly over half of Montana's total crashes occurred in urban areas in 2005. And, with increasing urbanization in the State, the proportion of fatal crashes in urban areas has increased steadily. New strategies to address urban area crashes will be developed in a later phase of CHSP implementation.

## *Existing Programs*

---

# Urban Area Crashes

## *New Strategies*

# Emphasis Area #11. Motorcycle Crashes

**Champion:** To be determined

**Objective:** Reduce Motorcycle Fatal and Incapacitating Injury Crashes.

**Performance Measures:**

- Total annual motorcycle crashes;
- Total annual motorcycle fatal crashes; and
- Growth rate in motorcycle crashes (one- and five-year).

Motorcycle crashes represent a relatively small proportion of Montana's total crashes, but because motorcyclists are at greater risk than passengers in an enclosed vehicle, motorcycle crashes represent a significant share of the State's fatal and injury crashes. It also should be noted that motorcycle registrations are increasing at an even higher rate, indicating that the rate of crashes per registered vehicle is actually declining. New strategies to address motorcycle crashes will be developed in a later phase of CHSP implementation.

---

# Motorcycle Crashes

## *New Strategies*

# Emphasis Area #12. Older Driver Crashes

**Champion:** To be determined

**Objective:** Reduce Older Driver Fatal and Incapacitating Injury Crashes.

**Performance Measures:**

- Total annual older driver crashes;
- Total annual older driver fatal crashes; and
- Growth rate in older driver crashes (one- and five-year).

While not appearing in the statistics as a current problem in Montana, demographic trends indicate that over the next 15 years there will be a steady increase in the number of drivers over 60 years of age. While most older drivers are good drivers, the effects of aging can affect the safe driving ability of some seniors, resulting in slower reaction time and reduced visual acuity. And if involved in a crash, adults age 65 and older are more likely to sustain fatal injuries because of physical frailty resulting from aging.<sup>2</sup> New strategies to address older driver crashes will be developed in a later phase of CHSP implementation.
